

**Job Title:** Front-End Developer**Job Overview:**

As a Front-End Developer, you will be responsible for implementing and enhancing user interfaces for web applications. You will work closely with back-end developers, designers, and product managers to create engaging, interactive, and highly functional web pages and applications. The ideal candidate will have a strong understanding of front-end technologies and web development best practices.

**Key Responsibilities:**

- Develop and maintain user-facing features using HTML, CSS, JavaScript, and front-end frameworks like React, Angular, or Vue.js.
- Collaborate with UX/UI designers to translate designs into interactive and responsive web pages.
- Optimize web applications for maximum speed and scalability.
- Ensure cross-browser compatibility and mobile responsiveness of all web applications.
- Implement modern front-end development practices such as single-page applications (SPA), component-based architecture, and modular code.
- Integrate with back-end services to fetch and display dynamic data via APIs.
- Troubleshoot, debug, and fix UI/UX issues and performance bottlenecks.

**Skills & Qualifications:**

- **Essential:**
  - Proven experience as a Front-End Developer or similar role.
  - Proficiency in HTML, CSS, and JavaScript (ES6+).
  - Strong experience with front-end frameworks (React, Angular, Vue.js, etc.).
  - Familiarity with CSS pre-processors (e.g., Sass, LESS).
  - Experience with responsive design techniques and mobile-first design.
  - Solid understanding of version control (e.g., Git).
  - Knowledge of RESTful APIs and how to interact with them from a front-end application.
  - Familiarity with build tools and task runners (e.g., Webpack, Gulp, NPM).
  - Excellent problem-solving skills and attention to detail.
- **Desirable:**
  - Experience with TypeScript or other JavaScript superset.
  - Knowledge of state management libraries (e.g., Redux, Vuex).
  - Experience with CSS frameworks (e.g., Bootstrap, Tailwind CSS).
  - Familiarity with testing frameworks (e.g., Jest, Mocha, Cypress).
  - Experience in integrating front-end with back-end technologies (e.g., Node.js, Django, etc.).
  - Familiarity with cloud platforms (AWS, GCP, etc.) or CI/CD practices.
