Data Structures and Algorithms

## INTERESTS

- Learning
- Listening Music
- Travelling

## LANGUAGES

English, Hindi, Punjabi

## Projects

### Online Shopping

Designed and implemented an online shopping system using CSS, Javascript and AJAX.  
Features include:

- Product Browsing and search
- Shopping Cart and Checkout
- Order Management
- Tracking
- Utilised Technologies: Java(Servlets, JSP, JDBC)
- HTML/CSS for structure and styling
- Javascript and AJAX for dynamic client side functionality.

### Video On Demand

Developed a Video on Demand system with a user-friendly GUI that contains Admin portal with login, home, and movie management User portal with login, signup and movie browsing capabilities. Movie details page for each video.

### Employee Management and Salary Disbursement System

Developed a C++ application for managing employee records and automating salary disbursement. The system includes features such as adding and viewing employee details, searching by employee ID or name, removing employee records, calculating and disbursing salaries based on holidays taken and generating salary.
